

Protecting your People, Property & Planet

Unique Innovation Event Fire Detection and Suppression

Hospital Club, 24 Endell Street,
Covent Garden, London WC2H 9HQ

Wednesday 11th May 2016, 3.00pm
(Seminar Starts at 3.30pm until 5.30pm)

Informal "Innovation demo event" offering you a luxurious private members club environment with a cocktail or coffee in hand whilst we share some fire detection and suppression innovations with you.

Is your Datacentre / Data protected against noise-induced damage to hard disk drives from the discharge of a gas extinguishing system?

There have been many incidents around the world that confirm the risk associated with the noise generated by the discharge of a gas suppression system disrupting Hard Drives and the entire storage systems in data centres, let us share the "facts" about the risk and what you can do to mitigate it, as Senseco have already done on other sites.

False Alarms – Don't accept sales talk about reducing false alarms, let us prove False Alarm Immunity and give you a written guarantee against them.

Don't accept promises in glossy brochures about false alarm reduction, demand proof and guarantees. We will show you at this event how our technology ignores "steam from showers", "burning toast risk from tea points", "dirt and dust from Car Parks and Plant Areas" and we will give you a written guarantee against False Alarms with £1,000 financial penalty against us if it fails.

Is your current system / provider fully compliant? – In fairness how would you know, let us guide you?

- **Are they accredited?** To Design, Install, Commission & Maintain your life safety system for both Fire & Suppression as these are separate approvals?
- **Does your system have Full System Verification Approval?** - You don't take your car for an MOT in pieces so why accept a life safety system that's been certified in pieces. Demand EN54 Part 13 Full System approval.
- **Are you responsible for a building with Sleeping Occupants – Hotel / Care Home / Hospital / Student Accommodation?** If so, your system requires different approvals, which are often missed by most products and installers
- **Is your system networked?** Are you aware of the latest Networking standards introduced under LPS 1653 to ensure your full system is secure?

We have many other innovations to share with you and discuss at our event.

The hospital club is a unique private members club in the heart of Covent Garden, London, for members of the creative industries. The seven storey building has an award-winning TV and Music Studio, a Gallery, Restaurant and Bars, a Screening Room, Hotel Rooms, and the Oak Room, a live performance space.

Spaces will be very limited for this exclusive event & attendance it is by invitation only therefore please register your interest by e-mailing seminars@sensecosystems.com or calling **0845 644 2888** asking for seminar bookings
